* The mean population for the year is obtained as follows:—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September, and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the poulation at the beginning and at the end of the quarter and dividing the sum so obtained by two. † Decrease.

* Owing to the Commonwealth Government having discontinued the distinction between the State production and that of the other States of the Commonwealth, it is now impossible to show the oversea destination of locally produced exports in this table, as shown previous to the year 1911. In the case of the Interstate Transfers, however, the value of local produce exported to each State of the Commonwealth is shown in the Summary of Table No. 11, page 62.

## PART IV.—INTERCHANGE.

### No. 10.—*GENERAL IMPORTS into the State of Western Australia during the Six Months ended 30th June, 1914.*

Duties on British and Foreign Imports are collected under the provisions of the Commonwealth "Customs Tariff Act, 1902." (Edwd. VII., No. 14).

NOTE A.—On all British and Foreign Imports 10 per cent. has been added to the fair market value of the goods at port of shipment.

NOTE B.—The "Quantities" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

(Compiled partly from Returns furnished by the Collector of Customs and partly from Returns collected under "The Statistics Act, 1907.")

PART V.—LAND SETTLEMENT, AGRICULTURE, LIVE STOCK, AND METEOROLOGICAL STATISTICS.

## No. 6.—*Privately-owned Land, and Crown Lands held under Lease or License, for which Returns (‡) were received, Season 1914-1915; also Cropping, Clearing, etc., for the same period.*

NOTES.—1. *The rectangular areas* adopted, which are shown on the map attached to this part of the *Statistical Register*, are comprised within the sheet lines of the Standard Plans of the Survey Department. Being permanently fixed they are units that can be readily sub-divided and re-grouped at any future time into new districts and sub-districts, without impairing their use for comparative purposes. Except where the areas are broken by the sea coast or other causes the area numbers here printed in black type represent areas of 8,437½ square miles each, whilst those printed in ordinary type represent areas of 937½ square miles each, and the sub-area numbers marked A, B, C, or D, as the case may be, represent areas of 234⅜ square miles each. 2. Areas in parentheses and marked with an asterisk (*), are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are unoccupied as regards the headings shown. Areas marked (†) are portions of areas only.

NOTE.—In addition to the above figures the following particulars were also obtained:—Acreage of Planted Forest Trees, 989 acres; Lands farmed on the "Share System": For Cultivation, 40,700 acres; For Dairying, 1,191 acres. (‡) The reason why Returns relative to certain alienated and leased land are not obtained under the Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree in the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose. § Including land on which timber was cut by Firewood Companies.

# Part V.—Land Settlement, Agriculture, Live Stock, and Meteorological Statistics.

* If importation took place during the year it was classified under some general heading, and not particularly specified. † It is possible that for this and subsequent years certain importations of currants and raisins have been returned as other Dried Fruit, thus accounting for the apparent decrease under the two former headings, and the increase under the latter. ‡ Including other essential oils. § Principally for breeding purposes.

NOTE.—This table has been compiled with the special object of showing the values of the importations into Western Australia during the last 10 years of such products of the soil and of live stock as might in the future be produced within the State, but are at present introduced to supply the deficiency in local production. It serves, in some respects, as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

*Prior to 1885, readings were not taken at 9 a.m. and 3 p.m., and the noon reading has been entered as the Monthly Mean. Since that date the mean is taken from the 9 a.m. and 3 p.m. readings. † The Thermometers were moved in August, 1885, to their present position in the Botanic Gardens, and as they have apparently given a slightly lower record since then, the means have been taken from 1886 only.

* Exclusive of cost of Administration. † By "The Assisted Schools Abolition Act, 1895," all grants-in-aid to these were abolished from the 31st December of that year. Thereafter these schools ranked as "Private" schools, as distinguished from "Government" Schools. The figures thence onwards include all private schools, secondary as well as primary. The average attendance, and, consequently, the percentage of attendance to enrolment at these schools for subsequent years, is partly estimated, some of the returns forwarded being obviously incorrect. ‡ Not ascertained for the previous years shown. § Including Schools closed during the year. *a* Year ended 30th June.

Therefore, the attendance by a clergyman is credited to the denomination whose Minister imparts instruction. † Special religious instruction has been given in 364 distinct schools.

* On 31st December. *a* From the first settlement of the colony up to the year 1837 there were no Blue Books issued, and the figures relating to arrivals and departures, shipping, imports and exports were taken either from the reports of the Harbour Master at Fremantle or from the Perth newspapers of that period. From 1838 to 1859, inclusive, the Blue Books give only the excess of arrivals over departures, or *vice versa*. *b* No records obtainable. *c* The figures for 1893 and subsequent years are for the year ended 30th June. *d* Exclusive of figures relating to Unclaimed Depositors' Fund, which for previous years have been included, but including figures relative to the Schools Savings Bank, which provision did not previously exist. *e* Departmental figures. *f* On 30th June.

* Records of Outward Shipping for several years are not available, and for such years, therefore, the same figures are shown as for Inward Shipping. Where, occasionally, the correct Outward figures have been found recorded, they naturally clash with the system adopted for the other years. † Total Gold Export is included in Table No. 3, "Gold Production," pages 6 and 7, which comprises gold received at the Perth Mint. *a* The exports up to the year 1834 consisted only of supplies to shipping, of which no record was kept. *b* No records obtainable.
